

# Organics 101

Knowing what classifies as "organics" is the first step.

Organics can be reprocessed and converted into compost, biofuels, and other useful materials. The first step is sorting - only the following can be accepted:

- Fruits & Vegetables
- Meat, Poultry, & Fish
- Bones & Shellfish
- Pasta, Bread, Dough
- Cereals, Rice, Grains
- Dairy Products, Eggs, Shells
- Cake, Cookies, Candy, Nuts
- Coffee Grounds & Filters
- House Plants incl. Soil
- Grass Clippings
- Tea Bags
- Flowers

**"We believe every piece of waste diverted from a landfill is one small step toward saving our planet."**

*- Tim Keller, Co-Founder, OrgaPro*

OrgaPro's mission is to help our customers manage their organics, recyclables, and e-waste, reducing the amount (and cost) of waste you send to landfills. It's a responsible business practice your customers will thank you for.
